

FEATURES & BENEFITS

ABOUT COOLBLU

The CoolBlu Cooler deploys a world class control system allowing the user to use the cooler as a food cooler or beverage cooler. State of the art locking system is simply programmed to turn on/off through the control system. This eliminates the need for different types of coolers. CoolBlu can do it all.

NAMA certified, this cooler has built in Bluetooth Technology with the ability to track number of door openings, length of time the cooler has been without power, time between last power cycles and finally, the maximum temperature inside the cabinet. Telemetry is also an option with CoolBlu.

Electronic Fan Motors

Reliable, high-performance fan that uses less power and last longer.

Intuitive LED Lights

LED uses the lowest energy available as well as indicating the coolers health lock status.

CFC & HFC Free Insulation

Eco-Friendly insulation creating an environmentally friendly cabinet.

Door & Cabinet

- One piece foamed cabinet offering maximum structural strength
- Easily reversible door to meet location requirements*
- Interior NSF certified white or black liner
- Standard 5 coated shelves

**Beverage Application Only*

Front Visible Temp

CoolBlu Refrigeration Module

FEATURES & BENEFITS

1. All in One Cooler

Each CoolBlu Cooler comes with a Health Lock that can be enabled or disabled. CoolBlu is the **ONLY** cooler in the marketplace today offering this feature.

Benefits:

- Provides greater flexibility and response time to customer requests or immediate changes.
- Minimizes the number of coolers one needs to keep in inventory.
- Saves time and money from having to physically change out coolers on location.

2. Modular Refrigeration Deck / with Lift System

The complete refrigeration deck can be removed from the front of the machine within minutes saving time and money. CoolBlu Coolers have one Standard deck that fits across all models. **The lift system inside CoolBlu is truly one of a kind.**

Benefits:

- Gives you full control over the maintenance of your cooler. No need to call a third party for repairs which usually means increased down time.
- Service Technicians only need to carry one deck which will work in either a food or beverage coolers reducing your inventory and spare parts budget
- Virtually anyone can change out a CoolBlu refrigeration deck.

3. Intuitive LED Lighting System

When using a CoolBlu Cooler as a Health Lock Cooler, and the temperature goes above 41 °F, the LED Lights inside the cooler turn OFF.

Benefits:

- Serves as an indicator to the consumer and service technicians that the cooler is **“LOCKED”** and needs attention.

4. Wide Range of Temperature Settings

Temperature settings can be set between 34-65 °F degrees.

Benefits:

- Allows you to set the cooler as a “chiller” unit in extremely hot environments protecting your chocolates and other products that could melt.

FEATURES & BENEFITS

5. Route Person Friendly

CoolBlu Coolers do not require a route person to enter into a service mode before filling the cooler. Simply opening and closing the door gives the cooler 30 minutes to cool down to temperature.

Benefits:

- No Thinking Required. Easy filling process
- Once the cooler has been filled, opening and closing the door again resets the 30 minute timer for extended pull down time.

6. Pico Ready

Sometime in Q2 of 2021 all CoolBlu Coolers will ship ready to accept and power the 365 Retail Market Pico device.

Benefits:

- The combination of Pico and CoolBlu will improve the ROI on smaller to mid-size locations.

7. Supported by a Professional Network of Distributors

CoolBlu Coolers are supported by a professional network of distributors and brokers across the US.

Benefits:

- Coolers will ship from one of multiple locations minimizing your freight cost.
- CoolBlu has local representation in most major cities throughout the US.
 - Some representatives may be able to provide a White Glove service when required and available.

8. Field Programmer

CoolBlu offers a field tool that allow you to update software in the field by simply plugging in the field programmer into the DEX port.

Benefits:

- Allows you to quickly and easily update software should the need arise.

9. Health and Safety Demonstration Test

At times, you may be asked by State Health Inspectors to demonstrate how the cooler locks when temperature rises above 41°F. CoolBlu Coolers have an easy access feature that allows for this demonstration.

Benefits:

- Reduces down time during health inspections by quickly demonstrating Health Lock Cooler function.
